## Summary

Final-year Computer Science Engineering student with strong foundations in DSA, OOP, and full-stack development. Passionate about building scalable web applications and solving complex problems with efficient solutions for dynamic engineering teams. Seeking opportunities to contribute to scalable software engineering projects.

## Education

### Bachelor of engineering, Computer Science

*Sambhram Institute of Technology – 8.4 CGPA*

2022 – 2026

*Bangalore, Karnataka*

### XII

*M.E.S P.U college – 82%*

2020 – 2022

*Sirsi, Karnataka*

## Projects

### Women Empowerment Web App | *React, Node.js, Express, MongoDB, JWT*

September 2025

- Developed a unified platform addressing Social Impact, HealthTech, and LegalTech needs for women across four modules (Safety, Wellness, Legal, Resources).
- Integrated a Breast cancer Check tool and a real-time BMI Tracker, improving user health awareness and self-management.
- Implemented a robust Emergency SOS system with configurable emergency contacts and custom messaging capabilities, enhancing user safety.
- Curated and organized comprehensive resources on Indian Women's Rights (Inheritance, Property, Domestic Violence) and government schemes for accessible legal guidance.

### Event Judging and Management System | *Node.js, Express, MySQL, EJS, JavaScript, Tailwind*

September 2025

- Developed a full-stack web platform with dedicated Admin Judge panels to manage 1000+ students across multiple events.
- Enabled real-time student assignment and scoring, ensuring transparent and efficient evaluation across multiple events.
- Built dynamic dashboards for progress tracking and event insights, cutting manual coordination by ~70%.
- Automated score submissions and validations, reducing result compilation time by ~50%. Designed a robust multi-judge workflow with room management and closing processes, ensuring accuracy and fairness.

## Certifications

### *Google Cloud Certified*

June 2025

- Achieved Google Cloud Certified status, demonstrating proficiency in cloud architectures and services.

### *Let'sUpgrade Python Project Bootcamp*

July 2024

- Completed intensive Python development bootcamp with hands-on projects and code reviews.

## Technical Skills

**Languages:** Java, JavaScript, HTML/CSS, C, SQL, Python.

**Developer Tools:** VS Code, Eclipse, Git.

**Technologies/Frameworks:** Node.js, Express, React.

## Achievements

### *Final Round Participant, IBM National Hackathon*

August 2025

- Qualified for the final round after excelling in a first-round challenge focused on Data Structures and Algorithms.
